Local Items

Mr. and Mrs. F. W. Johnson of Rearville, left on Tuesday for Vermilion district where they have rented a farm.

The Langford U. F. A. sports which were to be held on June 3, have been postponed on account of the rain until Friday, June 19.

The Chinook Intermediate baseball team went to Youngstown on Saturday and played against the local boys. The local lads again showed good form and won out by a score of 12-20.

Mr. A. G. Lowe, of Calgary, brother of Mrs. J. S. Smith, was a visitor in town on Saturday.

M. A. Jordan is back in town again playing ball with the local team.

Geo. R. Holeton, of the Agricultural School at Oids, was in town last week.

A baseball match will be played in Chinook on Friday-evening between Hanna and Chinook. This is the first match of the season, and a good game is anticipated.

O. L. Mielke was a visitor in Drumheller over the week-end.

Among the successful candidates in the examinations of the Associated Board of the Royal Academy of Music, and the Royal College of Music, of London, England, conducted by Dr. E. T. Sweeting in Calgary recently, appears the name of little Miss Margaret Parson, daughter of Mr. and Mrs. E. G. Parsons, of Chinook. Miss Parson passed her examination in pianoforte playing.

Dr. J. Newton and Mr. Thos. Mather, soil experts of the Department of Agriculture, Edmonton, are at present working on a soil survey in the Chinook district.

Mrs. E. Foster, of Vancouver, is visiting her daughter, Mrs. E. G. Parson.

Remember the public meeting in the Chinook School next Friday afternoon, June 12, at 2 o'clock. Every citizen in the district is cordially invited to attend.

Mr. and Mrs. Geo. McIntosh expect their daughter, Muriel home shortly for the summer holidays. Miss McIntosh is attending school in London, Ont., and has been very successful with her art. Last year she won a bronze medal, donated by the Canadian National Railways for an advertising poster. Her drawing was a mountain scene. This year she won the shield for painting.

Crops Doing Nicely

During the past week weather conditions have been ideal for the growing crops. Almost every day nice showers of rain have fallen in the Chinook district, and there is abundant moisture to carry the crops along for several weeks. The country is looking fine and prospects for a bumper crop were never better.

Drive For Pools Under Way

The province-wide drive for memberships for the dairy, livestock and poultry pools is well under way, and will be in progress until June 28. In connection with the drive, a great campaign of meetings covering every district in the province, is being held. There will be more than 500 meetings, with speakers including provincial, legislative members and prominent agriculturists.

Preparations for the reception to Alberta of Walton H. Peteet, the American co-operative expert who is to assist the pools with 5 meetings in the province, are practically complete. Mr. Peteet, who is Secretary of the federation of all U.S. co-operative marketing associations, will arrive in Lethbridge, June 13, and will be met there by Premier Greenfield or acting Premier Hoadley, and A. B. Claypool, Chairman of the Joint Pool Committee.

Mr. Peteet will speak in Calgary June 15th, and his speech will be broadcasted from the Calgary Herald Station.

A Glorious Day!

Interest in the Chinook Fair is increasing daily, and the recent rains are going to make, possible a much better showing of roots and vegetables than usual.

Many membership tickets have already been sold.

This year there will be a class for Dairy cattle. So bring along your good milk cows. With the formation of the Livestock, Dairy and Poultry Pools, there should be an increased interest in good cattle and poultry. In the poultry class the Society has already a donation of \$5 cash as a special prize for the best rooster.

The various committees are sparing no effort to make this fair the best ever held in Chinook.

Remember the date Thursday, August 6.

BADLY INJURED

Harold Wilmot, a boy working for Mr. H. H. George, of Coliholme, met with a serious accident last Tuesday. It appears that he was harrowing in the field when he fell in front of the harrows. Mr. George noticing the horses standing still in the field went to find out what was the matter and found the boy lying underneath the harrows. He was taken to Cerebral Hospital and on examination he was found to be suffering from a broken leg.

Liberal Convention To Be Held In Cerebral

A Liberal Convention will be held in Cerebral on June 18, to select a Liberal candidate to contest the Acadia Constituency at the next Provincial elections. Hon. Chas. R. Mitchell, the Liberal Leader, will address the convention.

Union Church

Service will be conducted by Mr. R. Smith in the Chinook Union Church next Sunday evening at 7.30. Subject: "Wanted—Chinook's Opinion." Service at Crystal School at 3 o'clock in the afternoon. You are invited.

Nazarene Church

Service will be held in the Chinook School next Sunday afternoon. Adult service at 3 o'clock. Children's service at 2.30. Every body welcome.

Perhaps you are using good tea. We think "Red Rose" extra good. Won't you try it?

RED ROSE TEA "is good tea"

The same good tea for 30 years.

Give Thornton A Chance

Canada's Parliament has been in session at Ottawa for many months but the "man in the street" would be in a real quandary if he was asked to state just what has been accomplished in a concrete way and of a constructive character for the upbuilding of the Dominion through the development of its resources and the promotion of its basic industries leading to national prosperity.

There has been oceans of talk. Weary weeks were spent thrashing over old straw in the debate on the Speech from the Throne, and still more weary weeks in unproductive talk during the debate on the Budget. Millions of dollars have been voted for various services. But, after all, what has really been accomplished?

Apart from these things, much time has been devoted to discussion of the Canadian National Railway and its management. Admittedly this is a subject deserving of close attention and it is right and proper that Parliament should do everything in its power to help place the system on a sound footing and co-operate with the Government and railway management in strengthening its position and hastening the day when, instead of constituting a heavy drain on the finances of the country, the C.N.R. will be revenue-producing and a source of financial strength to Canada.

But the general trend of the discussions at Ottawa do not appear to have that end in view. Rather there has been petty and carping criticism of minor details which should find no expression on the floors of Parliament and which it should be beneath the dignity of that body to even notice.

One of the best acts standing to the credit of the present Government was the securing of the services of Sir Henry Thornton as president of the Canadian National. He has thrown himself with abundant energy into the task of consolidating and making a really efficient system out of the separate railway units which were turned over to him. He has created a splendid esprit de corps among the large staff of employees, has built up the system in every respect, and today the C.N.R. is an effective and vigorous competitor of the C.P.R.

Yet Parliament demands the presence at Ottawa of a man of Sir Henry's standing and carrying such huge responsibilities to answer piousness criticisms regarding petty details of management which the Board of Directors of the C.P.R. would never think of expecting of President Deasy. The C.P.R. can spend a million or more in the construction of a hotel at Lake Louise in order to cater to and capture tourist traffic, and nobody objects but, on the contrary, applauds their enterprise. Likewise the C.P.R. is not criticized when it indulges in extensive advertising campaigns to get business. But Sir Henry Thornton and the C.N.R. are the targets of attack in Parliament because some money is expended to develop the attractions of the National Park at Jasper Park and because it, too, advertises extensively in order to develop and increase tourist traffic over C.N.R. lines. Even Sir Henry's private car and the room he occupies in a hotel are objects of attack.

Right at the outset when taking over the management of the Canadian National, Sir Henry Thornton voiced a warning against party politics being allowed to interfere in the management of the road, and he has repeated that warning on several occasions since, pointing out in the plainest language that while the C.N.R. can be made a success and an asset rather than a liability to the Dominion, but only if strict business principles are allowed to prevail in its direction and management and party politics are wholly eliminated.

Sir Henry Thornton is a big man and an outstandingly successful railway executive. He so proved himself in the United States, again in England, and still later during the war in France. Canada was fortunate in obtaining his services at a time when other big railway men thought the C.N.R. would prove the grave of any man's reputation. If Sir Henry is capable of handling his job, he should be left to do it and should be given the freest possible hand in working out and carrying his policies into effect.

Those members at Ottawa who are engaged in this quibbling warfare against the present management of the C.N.R. are the real obstacles to the success of public ownership in Canada. Their criticisms are in no sense constructive, but wholly destructive. They should be squelched.

Liberty Hurler Oats

The hullers variety of oat named Liberty, originated at the Central Experimental Farm, Ottawa, Canada, has been used for four years in experimental work carried on by the Ontario Agricultural and Experimental Union. The average yield during the past two years was 21.14 bushels to the acre, standing in fourth position in the varieties tested over the province.

Compensation Is Suggested

A section of the Animal Contagious Disease Act will be amended by extending the time during which the owners of animals slaughtered on account of disease, may receive compensation, when a bill introduced in the House of Commons becomes law.

Every time a doctor collects a fee, says a punster, he adds to his ill-gotten gains.

New Marriage Laws

Three clear days of the date of issuing of marriage licenses will be required before the marriage can take place in Ontario under legislation which goes into effect at once. The measure is designed to prevent hasty marriage. A penalty of a fine of not more than \$100 is provided for those solemnizing marriages within three days.

Oldest British Prisoner Dead

Maintained in comfort at the municipal jail for some years, W. M. Brothers, 104 years old, known as the oldest prisoner in the British Empire, died at the institution recently. The aged man was one of several without means of support who are looked after at the city's expense.

Some men are like phonographs—they talk a fine deal, but never say anything original.

Another Menace To Airmen

Experts Trying to Discover Protection Against Atmospheric Electricity

A new peril of the air is revealed in the testimony given in London at the inquest on the death of Pilot Sergeant Frank Lowry, who died while carrying out wireless tests in an aeroplane over Andover airdrome. The flying officer in charge gave evidence that after they had been in the air for fifteen minutes he noticed a peculiar smell and saw smoke issuing from the rear of the cockpit. On investigation he found that Lowry had collapsed at the bottom of the cockpit. The only conclusion he was able to draw as to the cause of the smoke was that Lowry must have come in contact with an electric current in the air due to atmospheric causes, although never in his career had he heard of anyone being killed by atmospheric electricity, although apparatus was sometimes damaged. Experts are now carrying out exhaustive tests to discover if this sinister force has been responsible for any of the unexplained air crashes and how it is possible to protect pilots against it.

Will Assist Child Emigrant

Scheme Arranged Between Canadian and British Governments

A scheme of assisted passages to Canada for children going to the Dominion through the medium of voluntary child migration societies has been arranged between the Canadian and British Governments.

The Canadian Government will make a free grant of \$16 per child and will pay inspection fees. The British Government will give a free grant toward the cost of societies of after-care organization for children in Canada.

Home Not Complete Without Nerviline

When your stomach is badly upset, when you are belching gas and suffering from nausea, the quickest relief will come from 20 drops of Nerviline. Take it in sweetened water and you get an immediate result. Nerviline has been used for nearly half a century and is considered a necessity in most homes, because of its usefulness in preventing many small ills that constantly arise. Sold everywhere in 35 cent bottles.

Canadian Fliers' Fine Record

Airmen In 1924 Made Up 3,340 Hours Without Fatality

Aviators in the Royal Canadian Air Force set a new record for safe flying last year by making up 3,340 hours of actual flying time without a fatal accident in carrying air mail, paroling forests and fisheries, and performing other government services, said a report from the department of the interior.

More than 5,000 acres of forest in Alberta were covered twice a day by air patrols during the season of fire hazard, and in Manitoba 100,000 acres were under observation. The forces photographed 40,000 square miles of terrain for the topographical survey.

MY SIX LITTLE ONES USED BABY'S OWN TABLETS

Mrs. John A. Patterson, Scotch Village, N.S., says:—"The Tablets in our home, and the only medicine they get is Baby's Own Tablets, and I have not known the Tablets to fail when a medicine was needed. No mother should be without the Tablets in the house. Like Mrs. Patterson thousands of other mothers are quick to praise Baby's Own Tablets for bringing health and comfort to their children. The Tablets are a mild but thorough laxative which regulate the stomach and bowels, thus banishing constipation and indigestion, colds and simple fevers, and making teething easy. They are guaranteed to contain no opiates and are perfectly safe for the youngest child. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

No Unemployment in France

Not Healthy Sign When It Means Decrease In Population

There is no unemployment in France. That seems a miracle to England, with its mass of unemployment. But the security of the French, which leads to that condition is not a healthy sign. It is, on the contrary, another reminder of that greatest danger of all to France—the decrease in population. France is not producing youth enough to do the work in factories and fields. Its birth rate is dropping to low that the figures are terrifying to patriotic Frenchmen—Sir Philip Gibbs in the World's Work, New York.

When a man has gone to seed it is almost time to plant him.

Keep Minard's Liniment In The House

THE SHEET METAL PRODUCTS CO. LTD. MONTREAL TORONTO WINNIPEG SASKATON EDMONTON VANCOUVER CALGARY

Was First Woman Graduate of Alberta

Hamilton Girl Has Been Practising Law In Toronto

Miss Ethel Bertha Fagan, of Hamilton, Ont., has the honor of being the first woman to graduate from the University of Alberta.

Before going to Alberta to take her course, Miss Fagan was for ten years engaged in law work in Toronto. For two years of this time she was articled, and has a number of clients of her own. She found there were many reasons for the advice of a woman in the matter of investment and she expects to work up this line of practice. However, Miss Fagan expects ultimately to go into social service work. This has been her goal for several years. Law training is said to be more helpful in this work.

Value Of Taxable Property

Analysis of the Per Capita Value in the Different Provinces

The total assessed value of taxable property in 82 towns and cities in Canada having a population of 5,000 and over in 1922 was \$3,082,251,736, being a per capita value of \$1,001. Analyzed by provinces the per capita value of taxable property in municipalities of 5,000 and over was as follows: "STATISTICAL INVESTIGATION OF TAXATION IN CANADA" UNIVERSITY INVESTIGATION OF TAXATION IN CANADA, Vol. 1, p. 129.

Attacked by Asthma. The first fearful sensation is of suffocation, which hour by hour becomes more desperate and hopeless. To such a case the relief is brought by Dr. J. D. Kellogg's Asthma Remedy seems nothing less than miraculous. Its help is quickly apparent and soon the dreadful attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

Heavy Seal Catch

Greater Than In Any Year Since Pelagic Treaty In 1911

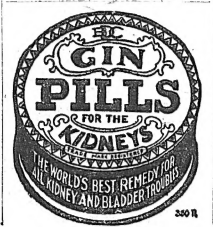

"Up to the present time the Indians have made greater catches of fur seals off the west coast of Vancouver Island than in any year since sealing was closed to the white man by the Pelagic treaty in 1911," stated James Sloan, fur dealer, who has returned from a trip among the Indians of the west coast. He purchased 2,200 skins, costing roughly \$20,000. Most of the skins are now in Victoria awaiting the inspection of the customs before being shipped via the Panama Canal to C. M. Lamson, London, for the October sales.

Big Cattle Shipment

More than 600 cattle were included in the last livestock shipment from Edmonton to the Scottish market, the consignors being Livestock Producers of Canada.

Minard's Liniment For Corns and Bunions

Many Homestead Entries Seventy-one homesteads were taken up in the Edmonton land office during the month of April. Three soldier grants were also filed on.

Is C. W. N. A. Booster

S. N. WYNN

Member of Board of Directors of the C.W.N.A., and Managing Director of the Yorkton, Sask., Enterprise. Mr. Wynn will attend the Canadian Weekly Newspaper Association Convention to be held in Winnipeg on June 24, 25 and 26.

Proposed Pulp Mill

May Erect a Hundred-ton Mill On Lake Winnipeg

Premier John Bracken announced that the Manitoba Government had decided to approve the proposals made by the Hon. Charles Stewart, minister of the interior, involving the immediate establishment of a hundred-ton pulp mill on Lake Winnipeg. Premier Bracken proposed certain modifications of the proposal which he sent by letter to Mr. Stewart. The modifications would confine the selections of the pulpwood to the east side of Lake Winnipeg and limit those areas to the amount adequate to maintain a hundred-ton mill.

The proposal which the Bracken Government has had under consideration was that the J. D. McArthur interests be allowed to give up their "1A" comprising 1,080 square miles on the east side of Lake Winnipeg and select an equivalent area elsewhere in the province.

It was represented that if this concession could be made, Mr. McArthur had a binding arrangement with the Spanish River Paper Company that it would build within a year a paper mill in the province with a capacity of 100,000 tons of paper.

A Ban On Verbosity

Recommend Forty-Minute Speeches Rule in House of Commons

Forty-minute speeches will be the general rule applying to House of Commons debates if the recommendations of the special committee which has been considering the revision of the rules of the house are adopted. "No member except the prime minister, the leader of the opposition, or a minister moving a government order and the member speaking in opposition after such minister, or a member making a motion of 'no confidence' in the government, and a minister replying thereto, shall speak for more than forty minutes at a time in any debate."

In recommending that the membership of each standing committee of the house be reduced, the committee advocates that "the membership of any standing committees consist of not more than thirty."

The Oil for the Abolition.—In rubbing down the joints with oil, Dr. Thomas' Electric Oil an excellent article. It renders the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

Erect Monument to Verigin

A sarcophagus of Kootenay granite, costing \$5,000 now surmounts the tomb of the late Peter Verigin on the rocky hill overlooking Brilliant, B.C. Does surmount it and a grubhouse and shovel, typifying the agricultural pursuits of the Doukhobors, are among the carvings. The inscription will be left to young Peter Verigin, the new leader, when he arrives from Russia.

Minard's Liniment For Backache

Platinum Production Finally revised statistics for 1921 on the production of platinum, as reported by the bureau of statistics, show that except for a small amount of 5 ozs., which was recovered from British Columbia placers, the total output of 9,136 ozs., was derived from the copper-nickel ores of the Sudbury district.

There is no harm in a man's being in advance of his age providing he has money enough to live on until his age catches up with him.

For Aches and Pains Use Minard's Liniment

ECZEMA IN RASH AND BLISTERS

Had to Keep Hands Bandaged. Cuticura Healed.

"Eczema broke out in a rash and blisters between my fingers and on the backs of my hands. The skin was red and swollen and used to peel off, it itched and burned badly and was awfully sore especially when I put my hands in water. I had to keep my hands bandaged. I sent for a free sample of Cuticura Soap and Ointment and it helped me. I purchased more and after using one cake of Cuticura Soap and one box of Cuticura Ointment I was completely healed." (Signed) Miss Nettie Keeso, R. R. 1, Listowel, Ontario.

Cuticura Soap, Ointment and Talcum are all you need for everyday toilet and nursery purposes. Send for a free sample of Cuticura Soap and Ointment to The Cuticura Shaving Stick Co., 25c.

Germany Willing To Stop Chemical Warfare

Would Agree to Complete Suppression Of Poison Gas

Germany announced that she was ready to participate in any international conference on the subject of the complete suppression of the use of chemical and poison gas warfare. Germany's announcement was made by Herr von Eckhardt at a meeting of the military and naval committees of the international conference for control of traffic in arms.

WALKED THE FLOOR FOR HOURS NERVES WERE SO BAD

Wherever there are people who are troubled with deranged nerves they will find in Milburn's Heart and Nerve Pills, a remedy that will restore the equilibrium of these deranged centres and bring back the shattered nervous system to a perfect condition.

Mrs. W. W. Audhouse, Woodroffe, Ont., writes:—"After having a severe attack of bronchitis I was left in a very weak, run-down condition; my nerves were all broken up; I could not sleep at night, and would have to get out of bed and walk the floor for hours."

MILBURN'S HEART AND NERVE PILLS

I began to feel much better, and after taking a few more boxes I could enjoy my rest as well as I ever did. I always recommend them to all my friends.

For sale at all druggists and dealers; put up only by The T. Milburn Co., Limited, Toronto, Ont.

New Catholic College

Preparations are under way for the erection of a new Catholic college to be affiliated with the University of Alberta at Edmonton. It is estimated that the construction costs of the new collegiate building will approximate \$200,000.

Spare the children from suffering from worms by using Miller's Worm Powders, a most effective vermifuge with which to combat these insidious foes of the young and helpless. It is an excellent worm destroyer, and when its qualities become known in a household no other will be used. The medicine acts by itself, requiring no purgative to assist it, and is so thoroughly that nothing more is desired.

Mission Work In China

Four additional missionaries for the foreign fields have been appointed by the Methodist Church to sail this summer for China. Miss Barbara Pearl Nichols, of Portage la Prairie, Man., just graduated from Brandon General Hospital, and Miss Evangeline Lamm, of Virden, Man., who has just completed her course at Winnipeg General Hospital, after language study, will be engaged in hospital work in Szechwan province, China.

Children Cry for

MOTHER.—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Purgative, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of P. H. Fletcher. Proven directions on each package. Physicians everywhere recommend it.

Boys' And Girls' Swine Clubs Have Created Greater Interest In Marketing Methods In Canada

The success of last year's efforts, through the medium of the Boys' and Girls' Swine Clubs, to interest the boys and girls of Western Canada in the breeding of better bacon types of hogs has given a decided impetus to this year's effort, in the opinion of officials of the Canadian National Railways agricultural department. In nearly every district also, where clubs were organized last year, the effect is now to be seen in the production generally of a better class of bacon hog, due to the importation in many instances of improved bacon type sires for community use.

Organizing of boys' and girls' clubs is reported from several points along the Canadian National lines, in addition to those which last year had entries at the various exhibitions in the western provinces, and, as a result, it is anticipated that the contents for the right to represent the provinces at the Royal Show in Toronto this year will be even more keenly fought out than were those of 1924.

Not only among the youngsters, but also among the older people, is the effect of the swine club movement being noticed. In the case of two Manitoba points, where swine clubs were organized in 1922, marketing of hogs increased from \$5,225 in 1921 to \$31,200 in 1924 at the first point, and from \$12,550 in 1921 to \$21,037 in 1924 at the second point of shipment. Apart from the increase in numbers, the most noticeable change was in the quality of the hogs. Whereas the color and types were very mixed, prior to the formation of the clubs, the shipments in 1924 were practically all one color and the hogs were of very much superior quality.

Clubs are organized under the joint direction of the Dominion and provincial departments of agriculture, with the following objects:

To stimulate greater interest in swine raising amongst boys and girls and to develop a more general knowledge of swine-marketing methods in Canada.

To give boys and girls practical instruction in swine judging, so that they may have sufficient knowledge of the desirable market type to enable them to select breeding stock intelligently.

To develop the community principle of swine breeding.

To demonstrate the value of producing a superior type of bacon hog and marketing it to the best advantage.

To create a closer study of production costs and bring about improved methods of feeding and management.

A swine club may be organized where it is possible to secure ten or more members between ten and twenty-one years of age on September first of the current year.

The members must all have the same breed of pigs, which are the progeny of a pure-bred bacon sire.

All swine entered for competition, either at a local fair or in carload lots, must be owned and fed by a member of the club for at least three months previous to date of the local exhibition.

The member must own two pigs and preferably three, one of which is a female to be retained for breeding purposes.

Pairs of pigs are to be exhibited at the local boys' and girls' club fair, or at a local agricultural fair, or in the absence of either, at a specially arranged swine show.

A club may also exhibit a carload of pigs in a carload competition, which is held at a central point in the province.

The Canadian National Railways, in order to encourage the work of Boys' and Girls' Swine Clubs and the raising of select bacon hogs in territory tributary to their lines, offer the following special prizes:

(1) The winning demonstration team of the Boys' and Girls' Swine Club from each provincial district shall be the guests of the Canadian National Railways while travelling over their lines to the place where the provincial carload competition is held each year.

(2) The demonstration team of the Boys' and Girls' Swine Club winning the provincial championship in this competition shall be presented with gold medals by the Canadian National Railways and shall be the guests of the Canadian National Railways at the Royal Agricultural Winter Fair, Toronto, Ontario, in 1925.

(3) The winning team from each province will compete in an inter-provincial competition while attending the Royal Agricultural Winter Fair at Toronto, the winners to hold for one year the challenge cup presented by Vice-President W. D. Robb.

Salt was so rare in the old Roman days, that soldiers received a small portion as a part of their pay.

Annual Agricultural Statistics

Census of Field Crops and Livestock For 1925

It is announced by the Dominion bureau of statistics at Ottawa that the annual census of field crops and livestock for 1925 will be made this June. These statistics are collected jointly by the Dominion and Provincial Governments by means of cardboard schedules issued to farmers through the rural school teachers and children. In British Columbia they are mailed direct to the farmers. These schedules call for the acreage sown this year to the principal field crops and for the numbers of farm animals owned on the farm in mid-June. The areas thus collected form the basis of the annual statistics of acreage and yield. It is very important for all classes in Canada that correct statistics of agricultural production should be published, but it is especially so for farmers themselves who through consecutive wheat pools are now undertaking to market their own wheat and other products; because accurate statistics are essential to the fixing of fair prices. Any farmer who has not received the blank cardboard schedule through the rural school of his school district or otherwise by the middle of June should make immediate application for same, either to the teacher of the public school district in which he resides, to the provincial department of agriculture at the capital of his province, or to the Dominion statistician at Ottawa.

Farm Sales A Barometer

Outlook For Agriculture In West Creating New Confidence

One of the most convincing signs that Western Canada is staging a come-back is given in the report of the department of agriculture of Manitoba with respect to the sale of provincial lands for the eight months period ended on April 30. During that period Manitoba received \$240,000 for the sale of lands owned by the government, and on interest and capital payments on previous sales. This is the largest amount received during any previous eight months since 1914. There is now a much greater interest in farm lands in the west, say the many years. The enquiries suggest that practical farmers are turning their attention to greater production. The conclusion to be drawn from that circumstance is that the outlook for agriculture has improved to such an extent that the population depending upon the profits from that industry is inspired by a new confidence. That is a wonderfully encouraging symptom of business revival.—Sarnia Canadian Observer.

Sugar Beet Production

Industry Assuming Considerable Proportions In Canada

Production of sugar beets in Canada during 1925 amounted to 159,200 tons, valued at \$1,922,688 and grown on 17,341 acres, according to a bulletin issued by the bureau of statistics. The total production of granulated sugar from beets in 1925 was 32,423,160 pounds. This year the acreage devoted to this crop will undoubtedly be much larger than in any previous year, due to the re-establishment of a sugar beet factory in Southern Alberta, where over 6,000 acres have been planted to beets this year.

Government Motion Pictures

Advertising Canada's Natural Resources By The Film Method

As part of the government motion picture bureau's plan to encourage the taking of motion pictures in Canada, which serves to advertise the country, bring capital here and exploit Canada's natural resources, Milton Sills, motion picture actor, and a company, will arrive shortly and proceed to Bouchette Creek, about 240 miles north of Ottawa, where a picture will be taken featuring lumbering scenes in Northern Ontario.

Baroness Is A Lawyer

Strange things have happened (that a peeress in her own right may yet be a law lord. Lady Clifton is in the latest batch of barristers. The 25-year-old baroness is owner of brains as well as birth. In one of her law examinations she came out first in all England, and she makes money by journalism of the kind that is wise about Paris, and illustrates it with her own pencil.

Japan has retired 489 army officers, including 36 generals and veeded 5,000 enlisted men from the service. This does not sound so war-like.—Pittsburgh Post.

Natural Resources Bulletin

Canada's Forests Provide Work For Many Thousands

The natural resources intelligence service of the department of the interior at Ottawa says: In 1922 there were thirty-two thousand men working in the sawmill and pulp and paper mills in Canada. In this work they earned seventy-two million dollars. The mills and timber limits, with their equipment, represented an investment of nearly six hundred million dollars. This might, with justice, be termed big business. Canada has a variety of such large organizations, and they are the backbone of the manufacturing life of this country.

Think for a moment, however, of what these large industries mean. Canada's virgin natural resources are being developed. Her forests are being utilized in building up Canadian industry and commerce, and this is as it should be. In providing work for these 32,000 men the forests were providing wages that enabled them to purchase the necessities and some of the luxuries of life. The development of the forests thus made itself felt in providing work for the factory worker who produced the foods which the forest worker required. The latter, also, was a consumer of foodstuffs, and the wages earned from forest development reached the farmer who produced the grain and meat supplies that the forest worker required. The farmer is thus interested in forest development.

To follow this interest in the forest to its logical conclusion we would of necessity have to include every trade, every industry, every business, every profession, and the workers thereof, because none is exempt from a connection, direct or indirect, with Canada's forest development.

With a population so closely allied to forest interests, it would appear to be the duty of every Canadian to see that the forests are protected from destruction by fire.

British Women Farmers

Many Would Come to Canada if Way Was Opened Up

Emily Plender, a graduate of the experimental farm of Leeds University, is in Winnipeg to begin a year's study of Canadian agricultural methods, with a view to creating a movement to Western Canada of English farm girls, on her return to the British Isles. "Girls on the farms in all parts of England are intensely interested in Canada. They are seeking an outlet for their surplus energy, and to improve the land and to be able to do so, they are looking for such a place as Canada, which is so well suited to their needs." Many of these young women, she declared, had sufficient funds to start farms of their own and would prove a valuable asset to the development of the western country.

Raising Blue Foxes

On Northern Island

Lumberman Has Leased 2,000 Acres North of Vancouver

Frank Buckley, well-known lumberman, has secured a lease on Mary Island, containing 2,000 acres of logged off land and will establish a blue fox farm there. As a starter fifty pairs of foxes will be placed on the land, but it is the ultimate intention to go into the business on a large scale, selling foxes for breeding purposes as well as supplying the world's markets with pelts.

Mary Island, which is 120 miles north of Vancouver, was logged over 25 years ago and has a network of trails for wagon roads all ready for the coming of the fur producing colony.

Prosperous Farmers

Farmers of Alberta Have Larger Returns Than City Residents

Addressing the board of trade of Central and Northern Alberta, Mr. H. Gordon, district superintendent of the government land branch, stated "that \$4,000 men engaged in farming in the province of Alberta during the year 1924 had a return directly from the land from farm products of \$217,000; that is a gross average of more than \$5,300 per farmer over and above what he raised for his own consumption. His net average, therefore, is as high, if not higher, than the average return of the city resident."

Here It Is Again

Reginald, said the Sunday school teacher, during a lesson on the baptismal covenant, "can you tell me the two things necessary to baptism?" "Yes, ma'am," said Reginald. "Water and a baby."

The average length of life in the United States is now 56 years, an increase of 15 years since 1870.

Seventeen men out of every 100 in Norway follow the sea or are dependent on it for a livelihood.

Epidemic Of Fairs Sweeping Germany

Cologne Stages Three Big Exhibitions In Search of Foreign Business

The epidemic of fairs which is sweeping over Europe has struck Cologne, which has just held its third exposition in less than two years. Time was when German enterprise in fairs was limited to the old-established fair at Leipzig, with Frankfurt as a second rate contender. Now there are regular spring and autumn fairs in Leipzig, Frankfurt, Berlin, Koenigsberg, Breslau, Danzig, Cologne and several other cities.

It is but natural that the Cologne fair has as its specialty an exhibition of everything connected with modern heating. The Ruhr Valley is the great coal and lignite basin of Germany, and many and diverse are the inventors and firms occupying themselves with the problem of rational heating. This year's fair abounded in heat-saving devices, such as small stoves producing heat economically.

The promoters of the fair say that this year's business was good. There have been numerous buyers from Belgium, Holland and England and even some from France.

Lower Birth Rate

The Birth Rate In Canada Continues Downward Course

The birth rate in Canada (with the exception of Quebec) continues its downward trend. According to the bureau of statistics, the rate for the registration area in 1924—which includes all provinces except Quebec—was 23.1 per thousand. In 1923 it was 23.7 per thousand; in 1922, 25.1. All provinces in the registration area, but one showed a decrease in 1924 as compared with the previous year. Ontario remained unchanged at 22.2 per thousand.

Rates per thousand births in the other provinces of the registration area were: Prince Edward Island, 1924, 20.0; 1923, 22.5. Nova Scotia, 1924, 20.0; 1923, 22.0. New Brunswick, 1924, 20.7; 1923, 23.0. Manitoba, 1924, 22.3; 1923, 25.5. Saskatchewan, 1924, 25.0; 1923, 26.3. Alberta, 1924, 22.4; 1923, 24.3. British Columbia, 1924, 17.6; 1923, 18.4.

More Brains In Rural Areas

People Living In The Country Are More Brainy Than City Folks

Contrary to general belief, persons living in the country have the greatest amount of brains as compared with dwellers, according to E. F. L. Wood, British minister of agriculture. "I want to combat a delusion of the city and town folks," said Mr. Wood speaking in Gloucester recently, "that the country child, man or woman, is less clever and intelligent than his brothers and sisters in the congested districts. The truth is that agriculture and the things associated with it demand a greater measure of intelligence, enterprise and grip than the work done by the thousands of townsmen."

Irrigated Land

Southern Alberta Irrigation Area In Good Financial Condition

According to the annual report of the Dominion water power and reclamation service for the past year, over 72,000 acres of the 77,000 irrigable acres in the C.P.R. Lethbridge project, under the water agreement were irrigated, there being 937 actual users of water, while the total value of crops grown on the lands exceeded \$1,000,000. Referring to the Taber irrigation district of 17,000 irrigable acres, now in the third year of irrigation farming, crops were good and the district in sound financial condition, the surplus funds having increased nearly \$3,000 over the previous year.

Kindly Act Of Prince

The following is among the many stories of kindly acts told of the Prince of Wales during his day at Cape Town. Noticing a small girl waiting a number of medals at a children's parade, the Prince asked her whose decorations they were. "They're daddy's," she said. "Where is daddy?" asked the Prince. "He was killed in the war," the child answered, whereupon the Prince lifted her in his arms and kissed her.

Artificial Ice Plants

First artificial ice plants in the interior of British Columbia will be established soon in Vernon and Revelstoke, it is announced by Charles F. Roland, former industrial commissioner for Winnipeg, who is in Vancouver completing arrangements for the incorporation of his company. At Vernon the company will operate a pre-cooling and cold storage plant for the handling of fruit.

With tracks seventy-six inches long Miss Jessie Jones, of Detroit, Mich., is believed to have the longest head of hair of any woman in the United States.

General Development of Dairying Is Gradually Revolutionizing Western Canada Agriculturally

Cut One Tree Burn Nine

Lumber Industries Will Fall If Forests Are Not Conserved

Dr. Robson Black, manager of the Canadian Forestry Association, claims:

In British Columbia we burn each year thirty-two times as much timber as we fell; farmers in Canada are three-fifths of all lumber users; nine trees burned in Canada for every one felled with saw.

We speak of the greedy lumberman, but for every \$5 worth of lumber he cuts he has to pay \$4.50 in costs and interest. Also he has to pay another 25 cents of the 50 cents to other co-operative businesses in the lumber trade.

In spite of that our lumber interests are attractive enough to make the Americans come over here in ever-increasing numbers. We have the best spruce reserves in the world. They should be good for from twenty-five to thirty-five years—with care. The woods we need to save, and which will have the greatest industrial value for our children's children, are spruce, white pine, and fir. Last year we burned in Canada 5,000,000 acres of forest. Unless we make a real and successful effort to preserve our forests we can say to the 5,000 timber and lumber industries in Canada, "You will have to close up in 1925."

We are more fortunate than the Americans. We still own the land on which our timber grows, while the Americans sold their outright. And the lumbermen plant a tree for every tree they fell.

In no other industry do we have to wait so long for results, but in none are the results more valuable or more diversified.—London Advertiser.

Stay On The Farm

The Advantages Are Generally With The Boy In The Country

We farmers have been led astray in this matter of schooling by a lot of zealots. We read frequently that the education of the country child is inferior to that of the city child. The reformers who state this—people for the most part interested in education as a commercial proposition—point to the one-room school, the poorly paid teacher, and the short school year. However, they do not try to prove that the children who have remained on the farms have ever fallen down on the job of production or that those who have left have been unable to compete successfully in business or professional work. Some of our reformers forget the advantages of disadvantages.—Glenn Birkett in the Atlantic Monthly.

Creamery Butter Production

Considerable Increase Is Shown During 1924 Over Previous Year

Creamery butter production in Canada during 1924 amounted to 182,870, 883 lbs., as compared with 162,834,669 lbs. in 1923, an increase of 12.3 per cent, according to the annual report of the department of agriculture. Production by provinces in 1924 was as follows: Prince Edward Island, 1,625, 497; Nova Scotia, 4,094,232; New Brunswick, 1,156,161; Quebec, 65,596, 627; Ontario, 590,000; Manitoba, 12, 632,714; Saskatchewan 13,552,902; Alberta, 21,000,000; and British Columbia, 2,676,670.

H. B. Road Campaign

Advocates Endeavor to Induce Government to Vote Money This Year

Advocates of the Hudson's Bay Railway are organizing a campaign to induce the government to include a further vote for the Hudson's Bay Railway in the supplementary estimates. Considerable capital is being made out of the fact that the government endorsed the resolution moved by Andrew Knox, M.P., which provided that this railway should have precedence over all other public works now in course of completion.

There have been informal discussions but hitherto no official conferences have been called.

No Change

"One thing that I like about our new ledger-keeper," said a member of a firm to his partner, "is that he's reliable. You can always tell what he is going to do next."

"And what is that?" asked the partner.

"Nothing," was the reply.

Boy Scout (to old lady).—May I accompany you across the street, madam?

Old Lady.—Certainly, sonny. They long have you been waiting here for somebody to take you across?

In meteoric manner Western Canada has arrived at a status where it seriously asserts its position as a premier dairying country.

A decade has seen a situation of a dependence on dairy imports changed to one in which millions of pounds of butter are made available for export every year. Yet indications are frequently given that what has been achieved in the last ten years is but the foundation upon which is to be built a greater dairying industry.

Recently dairymen representatives of the four western provinces, meeting at Regina, completed the organization of the Western Canada Dairymen's Association, which takes in 106,000 dairymen in Manitoba, Saskatchewan, Alberta and British Columbia. The central association will govern branches established in each of the provinces, and an active program is planned for furthering the interests of Western Canadian dairymen.

The three principal objects of the association defined are: (1) To improve conditions for dairymen in the western provinces. (2) To secure markets, particularly export markets, and to develop the most efficient and economical selling plan both for home and external markets. (3) To secure an increased dairy production of a higher standardized quality. These plans are laid along lines in which there has been already great development in the past few years.

The butter manufactured in Western Canada is a consistently high quality, due to uniform grading, so that at national competitions it surpasses that of the old eastern provinces. It has favorably penetrated export markets, so that there is every encouragement for stimulating production. Saskatchewan, for instance, which a few years ago was importing large quantities of butter, now exports upwards of 5,000,000 pounds per year, or nearly 70 per cent. of its production is marketed outside the province after supplying home requirements. Last year Alberta practically doubled its exports of butter to Japan out of Vancouver, whilst Western Canadian butter is developing a regular market in the British Isles, to which it travels by way of the Pacific coast via the Panama Canal.

The general adoption and development of dairying is slowly revolutionizing Western Canada as an agricultural area. Superb herds of dairy cattle are now to be frequently encountered, and it is to be remembered that the Western Canadian provinces first produced in Canada the champion dairy cow of the British Empire and have developed more than one world champion. Where a few years ago a silo was seldom to be seen, this is coming to be the natural adjunct of every mixed farm. In the past five years the production of alfalfa in Western Canada has increased from 112,800 tons to 147,800 tons, and of fodder corn from 252,500 tons to 370,200 tons. The farmer in Western Canada has arrived at a more intensive, securer conception of agriculture, which, according to every indication, he is making directly for.

British Wool Considered Best

Weaving Was Introduced In England

From the earliest time the wool grown in Great Britain was considered the best in the world. In the time of the Roman occupation of the island a manufacture of woollen cloth was established at Winchester, the cloth being for the personal use of the Emperor. Woollen fabrics in considerable quantities began to be manufactured in England about the year 1255, when weaving was introduced by John Kempe and other artisans from Flanders.

Canadian Tobacco

According to Trade Commissioner E. L. McCall, there are good possibilities in Argentina for Canadian tobacco, and some manufacturers have expressed a desire to experiment with Canadian tobacco for blending purposes. Argentina is a heavy importer of tobacco from Cuba, Kentucky and Virginia.

Don't Answer Her

"Caterpillars are the most voracious of all living creatures," said a naturalist. "In a month a caterpillar will eat about 600 times its weight."

Whereupon an old lady who was somewhat deaf interposed: "Those boy did you say he was?"—Christian Advocate.

Miss Miriam Hamilton, daughter of Isaac M. Hamilton, founder of the Federal Insurance Company of Chicago, has just been elected a director of the company.

W. N. U. 1580

TROUBLE BREWS OVER STRIKE AT N.S. STEEL MINES

Glouce Bay, N.S.—Three office employees of the British Empire Steel Corporation were injured when officials who had been doing maintenance work at the New Waterford power station were forcibly removed from their stations by 200 striking miners.

As a result of consequent stoppage of work at the plant, the mines in Glouce Bay and New Waterford districts are now flooding, and the town of New Waterford lacks light and water.

J. E. McLurg, vice-president of the corporation, wired President Armstrong for police protection for officials working on maintenance shifts. An exchange of views between I.D.I. President McLurg, of the United Mine Workers, and W. J. O'Hearn, attorney-general of the province, brought a declaration from Mr. O'Hearn that if the mine workers resorted to vengeance his department would take action.

District President McLurg sent a telegram to Hon. James Macdonald, minister of labor, again asking him to intervene and pointing out that "people living on 89 cents per week cannot forever be pacified in the face of the action of the Government of Nova Scotia."

Pooling Cattle Would Not Influence Market

Unless Flow of Livestock Could Be Regulated

Calgary.—Considerable information has been given by stockmen and others to the Saskatchewan livestock pool commission, which is in Calgary obtaining on the co-operative marketing of cattle.

The commission is composed of Geo. Langley, chairman; Edwin Evans, manager of the Moose Jaw stock yards; R. A. Wright, Driveway, Sask.; and W. Waldron, of the Saskatchewan department of agriculture. Much of the information given the commission was to the effect that if the market costs were reduced by a pool, it naturally would be to the advantage of the producer. However, the opinion was expressed that the mere fact of pooling cattle would not influence the general market price of livestock, but it was admitted that if it were possible to regulate the flow of the livestock to market, a pool have a beneficial effect.

Good Field For Canadian Trade

West Indies Offer Great Possibilities Says H. J. Logan

Hamilton, Ont.—The West Indies provide a great field for Canadian trade, H. J. Logan, K.C., M.P., told the Canadian Manufacturers' Association at luncheon. Mr. Logan described his recent trip there to investigate commercial possibilities. The business with the West Indies should be carried on, he said, if every other sea route were abandoned. Mr. Logan suggested changing the name of the Merchant Marine to the Canadian National Steamship Company.

Would Take Drastic Action

Advocates Deportation of Alien Criminals in Australia

Brisbane, Australia.—The need for the selection of immigrants, the deportation of every alien convicted of a crime, the advisability of keeping a record of all aliens in the Australian Commonwealth, and a more strict medical examination of newcomers, are suggestions made by T. A. Perry, royal commissioner, who recently inquired into the social and economic effect of an increase in the number of aliens in North Queensland.

He expressed the view that the existence of foreign clubs in Australia is undesirable.

Will Continue Wheat Pool Melbourne, Australia.—The Government of Victoria intends to introduce a bill into the Legislative Assembly providing for the continuation of the existing wheat pool for five years. Advances will be given up to 75 per cent.

Session Five Weeks Longer Ottawa.—Hon. Raoul Dandurand, government leader, intimated in the course of a discussion in the senate that parliament might remain in session another five or six weeks.

More than a thousand women doctors are now practising in Japan under government license.

Shanghai Armed Camp Under Martial Law

Shanghai.—Shanghai is an armed camp. Two outbreaks caused police to open fire, resulting in the death of two persons and the injury of many others. Banks were closed, store fronts were boarded up, food was being rationed out by shopkeepers, hotels and stores were searched for arms, while troops of several nations attempted to restore order after a series of uprisings started May 30.

Old Military Ceremonial Celebrated in London

"Trooping the Colors" on King's Birthday Reaffirms Allegiance London.—King George celebrated his sixtieth birthday. The court came to London from Windsor for the occasion, which was marked by the customary congratulations from relatives, friends and foreign rulers and eulogistic articles in the newspapers.

The chief public celebration in London centred around the old military ceremonial, "Trooping the Colors," the annual parade and evolutions by the Brigade of Guards in St. James' Park.

The yearly military pageant of trooping the colors has no counterpart in any other army in the world, and it really constitutes a re-affirmation by the Brigade of Guards of their allegiance to the sovereign and their privilege of mounting guards in special places and on special occasions of particular ceremony.

At the trooping of the colors the mounted officers of the Grenadier Guards used the saddle presented by the great Duke of Wellington to the Duke and the Life Guards appeared with the kettle-drums given by William IV, and also with the bugle which sounded their charge in the battle of Waterloo.

The King's birthday honors had, made public, follows the line of "safety and respectability" which was definitely instituted a few years back.

Unemployment and Crime

Average Criminal of Today Belongs to the Younger Generation

Winnipeg.—Marked increase of crime among women and the younger generations of Winnipeg during the past year was indicated in the annual report of Chief Constable Newton. The average criminal of today, the report states, is the boy of 17 to 18, at most 20 to 21 years of age. These youthful malefactors, the report declares, are "hardened criminals at heart," although not boys "in years," boasting to their friends and parading themselves in an effort to show how close they can stick to their criminal associates. Unemployment is blamed for much of the crime.

Credit Given Italy Is Important Step

Will Help Payment of War Debt and Stabilize Exchange

New York.—Establishment by J. P. Morgan and Company of a \$500,000 revolving credit for the stabilization of Italian exchange, which has been announced, was viewed in the financial district as a step of great importance, certain to strengthen Italy's position in refunding her war debt, and likely to pave the way for an eventual re-valuation of the lire on a new gold basis.

To Accept Wage Cut

Reported That Lethbridge Miners Will Return to Work

Lethbridge.—Lethbridge miners voted three to one to go back to work. The vote of the local camp was 264 to 99 to accept the wage cut, which is about six per cent. for contract men and about thirty per cent. for day wage men.

An Independent local union has been formed, known as the Lethbridge Miners' Federation, breaking away from the United Mine Workers of America.

Flight Is Abandoned

Tokio.—The end-of-the-world flight of Major Pedro Zandi, the Argentine aviator, interrupted here last year, has been definitely abandoned owing to the fact that his aeroplane, damaged when he attempted to take off at Osaka on May 11, cannot be repaired. The upper wing was damaged beyond repair. The supply ships sent here from Vancouver, B.C., are being ordered back.

World's Finest Ship

Washington.—The finest ship ever made, so slender that it cannot be seen without a microscope, has been manufactured by a physicist in the department of agriculture.

Retains Premiership

Hon. C. A. Dunning, Premier of Saskatchewan, whose Government was endorsed by the electors in the recent elections.

Dunning Government Has Big Majority

Liberals Gain Sweeping Victory in Saskatchewan Provincial Elections

Regina.—The final result of the Saskatchewan provincial elections, given the Dunning Government fifty seats. The Opposition secured eleven seats, three going Conservative and five Progressive. Two deferred elections in the north may increase the Government representation to 52. All members of the Provincial Cabinet were retained with the exception of the attorney-general.

GOVERNMENT TO HAVE MINISTER AT WASHINGTON

Ottawa.—The Canadian Government hopes to make the appointment of a Canadian minister to Washington very shortly. Premier King announced in the House of Commons, before the vote of \$50,000 for Canadian representation in the United States was passed by the commons.

The prime minister said that the government had not found it easy to secure the person it wanted to represent Canada and referred to the necessary expenses which went with such a post. Sir Henry Drayton, Conservative, South York, said it was an unnecessary duplication of the British ambassador's work at Washington, and asked if a like appointment for Paris was intended, or if not, why? The premier said the Paris office was satisfactory, but the late Sir James Bryce said Canada provided nine-tenths of the work of the British ambassador at Washington, including run-running, smuggling, waterways, and ever increasing trade.

T. A. Creer, Progressive, Marquette, criticized the government for not having made the Washington appointment long ago. J. S. Woodsworth, Labor, Winnipeg Centre, supported the proposal for a minister at Washington. He believed, however, that \$50,000 was too much for this purpose. The vote was then carried.

Defeat Amendment For Higher Tariff

Big Majority Against Revision Suggested By Hon. Meighen

Ottawa.—By a majority of 110 votes, the House of Commons defeated the amendment moved by Right Hon. Arthur Meighen, Opposition leader, calling for an immediate revision of the tariff on a definitely and consistently protective basis. The vote stood: For, 37; against, 147.

Conservatives present voted solidly in favor of the Meighen resolution. Liberals, Progressives, Independents and J. S. Woodsworth, the Labor member present, voted against.

Arrested For Stealing Own Car

Washington, D.C.—William W. Kendrick was arrested for stealing his own automobile. He reported to the police that his car was stolen from in front of his home. Later he found it but neglected to report. He drove down town and a policeman, noting the license tag, arrested him. He was released after establishing proof it was his car.

Take Photographs

Niagara Falls, Ont.—Disguised United States coastguard vessels sailed up the Chippawa creek and took photographs of six boats alleged to be laden with whiskey for future reference.

BRITAIN KEEPING CLOSE WATCH ON AFGHANISTAN

London.—As a result of alleged Soviet attempts in 1918 and 1919 to penetrate India, through the valuable northwestern frontier, the British Government has been especially watchful of Afghanistan affairs. It has also maintained a strong defence at the frontier ports, since German attempts to enter India from Afghanistan and the northwest during the war.

The British Government has a treaty with the Emir of Afghanistan, in which the Emir promises not to allow Soviet agitators to enter towns within certain distances from the Indian frontier.

It is pointed out in London that an Afghanistano-Indian frontier, fringed by foreign intelligentsia, could readily become a religious war and that would menace the greater part of India's population.

British observers have reported there is little possibility of any direct attack being made by the rebels against the British forces, but it is considered likely that the Emir will have to abdicate unless he is able to gather his supporters immediately and inflict decisive defeat upon the rebels.

Failed To Cheer Former Crown Prince

Berlin Crowds Resented Preferential Treatment He Received

Berlin.—The former Crown Prince of Germany enjoyed a few minutes of his pre-war glory again, when he appeared at Tempelhof field to witness the aeroplane competition in progress there.

American newspaper men, on approaching to interview the pilots, were curtly informed that foreigners were not invited to investigate Germany's aeroplanes. The crowds, which came to the field encountered everywhere the outspoken words or signs that said "verboten."

The former Crown Prince's review had all the earmarks of one of his old-time official appearances except that the crowds failed to cheer him and seemed to resent the preferential treatment he received.

Better Livestock Train

Now Making a Tour of the Province of Saskatchewan

Regina.—The "Better Livestock Train," operated under the direction of the Saskatchewan department of agriculture, will set out on this week a tour of the province in the interests of improved agriculture.

The train will be comprised of several carloads of pure-bred stock which will be used for demonstration purposes and which will be offered for sale, in addition to several lecture cars. Tree planting, fender crops and marketing are some of the problems that will be explained and demonstrated in these lecture cars.

Alleged Red Plot In Balkans Bared

Movement Was to Spread to Other States

Berlin.—The Deutsche Zeitung claimed to have possession of a document, intended to be confidential, according to which M. Lewitsky, councillor of the Soviet legation at Vienna, is to take advantage of his diplomatic immunity and direct Communist activity throughout the Balkans. The Deutsche Zeitung said the plan was to "Bolshevize" Bulgaria first and then to spread the movement to other Balkan states.

To Deal With Rum Ships

Blain Most of Run-Runners Fly the British Flag

Boston.—A call for reinforcements to deal with the growing rum row off Cape Ann and Boston harbor, augmented by vessels driven from New York waters by the coastguard blockade, has been sent to Washington by the coastguard.

The ships flying 22 miles off the coast has grown in recent days, first to eight and then to 12. Seven of the eight identified ships fly the British flag.

Act of Vandalism

Montreal.—The Montreal Star has offered a reward of \$500 for information leading to the arrest and conviction of the person who destroyed 17 new trees on the "Road of Remembrance" in Notre Dame De Grace. The trees, which were planted shortly after the war, were cut through about three feet from the ground. They were in memory of Canada's fallen.

Will Attend Convention

Jas. Macdonald, Editor and Proprietor of the Courier, Unity, Sask., and President of the Saskatchewan Division of the Canadian Weekly Newspaper Association. Mr. Macdonald hopes to have recovered sufficiently from his recent illness to attend the Annual Convention to be held in Winnipeg on June 24, 25 and 26.

Large Crowd Greeted Prince At Durban

Durban, South Africa.—One of the most enthusiastic of the many rousing receptions the Prince of Wales has had during his tour of South Africa was given him here. On his way from Ladysmith, where he visited battlefields of the Boer War of 1899-1900, every way-side railroad station had cheering crowds. When he reached Durban, the streets were packed with people along the route he was to traverse. Formal welcoming ceremonies were conducted in the town hall square.

Canadian U.S. Trade Vital Factor To Both

Reciprocity May Become Burning Issue Says Washington Post

Washington.—In an editorial on Canadian trade, The Washington Post, which is close to the Coolidge administration, analyzes figures given out recently by the Canadian minister of finance for the fiscal year ending March 31, and says trade between Canada and the United States is looking larger and larger as "a vital factor to the prosperity of both."

It says reciprocity may yet become a more burning issue than was dreamed of in 1912 and intimates it would be a good thing for both countries. While the balance of trade is still in favor of the United States, it predicts this will decrease as Canadian population and production increase.

The Post sees in the development of the Western Canadian provinces an invaluable "safety valve" for domestic manufactures and industrial products of many kinds.

CLAIM FOR U.S. LAND DISCOVERED IN THE NORTH

Provincetown, Mass.—Commander Donald B. Macmillan, when informed by The Associated Press of the report that Hon. Charles Stewart, Canadian minister of the Interior, had told the House of Commons that Canada claims all lands north of the Dominion to the North Pole, said: "There is nothing new in that claim, although I have often wondered on what it was based."

"Any land which we discover on the expedition which is to start this month from Boston will certainly be claimed by us for the United States. We were told of Canada's claim when we left in 1912 on the Crocker Island expedition. We sailed for 150 miles across the Polar Sea and took from the maps land which had previously been shown on them, but we found none."

"This summer's expedition will seek land in a region lying partly north of the Dominion, but the greater part will be north of Alaska. If we find anything we shall claim it for the United States, and I think that the nations of the world will regard it as just."

Keeps N.Y. Police Busy

New York.—Eight policemen are on one busy New York corner to stop jaywalking, which, police say, is responsible for the majority of the traffic accidents there.

Arrows For Big Game

London.—Stewart White, an author, and Dr. T. Saxon Pope will attempt to hunt big game in British East Africa with bows and arrows.

SECURITY PACT SOLUTION NOW LOOMS IN SIGHT

Paris.—The French reply to British observations regarding the proposed French note to Germany, answering the latter's suggestions for a Western European security pact, has been sent to London.

It was said in official circles that the matter is considerably nearer a solution. The French have tried to meet some of the British objections and believe an agreement is in prospect. After a cabinet meeting, at which the note was discussed, Foreign Minister Briand said France and Great Britain were agreed in principle, but that a number of details remain to be settled. He expressed the belief that an agreement will be reached and the note sent to Germany soon after the meeting of the League of Nations, which commences at Geneva this week.

The previously expressed British attitude regarding Germany's security pact proposal, is that the pact should be confined to Western European frontiers. France has desired Eastern European frontiers to be taken into consideration.

Foreign Minister Briand plans to take the opportunity during his attendance at the League of Nations' council, in Geneva, to discuss with the British foreign secretary, Austen Chamberlain, the Allied reply to Germany's security pact proposal.

Daughters Of Empire

War Memorial Fund Has Now Mount

Ottawa.—The war memorial fund of the Imperial Order Daughters of the Empire has mounted to \$382,890, according to the treasurer's report submitted at the organization's annual meet here. Strong financial standing was indicated in the report made by Mrs. J. T. Power, of Toronto. The order's balance, which includes the large war memorial fund, stands at \$403,712. The year's receipts totaled \$75,513. The war memorial fund was increased by \$52,294 in the year. Scholarships and bursaries from this fund cost \$18,262. Total disbursements for the year were \$40,195. Thirteen chapters were added during the year, the honorary secretary, Miss A. Stewart Galt, of Toronto, reported.

In Memory Of Statesman

Will Mark The Boyhood Home of Sir John A. Macdonald

Ottawa.—The council of Adolphus-town, Bay of Quinte, will erect a simple signboard at the side of the boyhood home of Sir John Macdonald, Canada's first premier, and strew flowers about the spot, according to Allan Ross Davis, of Toronto, one of the prime movers in the event.

"It is hoped that this first public recognition of that boyhood home may prove the beginning of a national interest which may result in the erection of a lasting memorial," Mr. Davis stated.

Unemployment In Ireland

Free State Parliament Makes Heavy Grant For Relief

Dublin.—The Irish Free State Parliament has voted £5,000 for agricultural and unemployment relief work. The unemployment and agricultural situation is a result of prolonged rains and unfavorable crop prospects. Deputy Coslin, of County Kildare, said that working people of his country were in a serious plight, and there would be deaths from hunger if the situation did not improve.

Proposed Wagon Road For Gold Area

Vancouver.—Hon. William Sloan, minister of mines, and Dr. W. H. Sutherland, minister of public works, have left here for Stewart and the Portland Canal district, on a trip of inspection. It is possible a wagon road from the head of the Portland Canal right through to Dense Lake in the Cassiar district, which is the scene of a gold rush, may result from their visit.

King Ethelbert's Tomb

London.—While engaged in excavation work in connection with the restoration of Sherborne Abbey, workmen discovered the coffin of King Ethelbert, who died in 855 and was buried in the abbey in 866. The coffin was made of stone, and contained the bones of the king of the West Saxons.

Linked Up With British

London.—His Majesty the King has approved the alliance of the Royal Canadian Dragoons with the First Royal Dragoons, and the Fifth British Colonial Light Horse, with the Fourth Queen's Own Hussars.

Farmers And Farm Help

Great Measure of Success Depends on Right Relationship

Without doubt, during the last quarter of a century, wonderful advances have been made in the art of agriculture. Research workers have proved very clearly, that such things as treatment of seed and proper rotation of crops are responsible for largely increased yields.

We know that intelligent buying and selling, have a very great influence upon the earning power of farming capital, but there are other factors which have an even greater bearing upon the success or failure of the agriculturalist.

The point we have in mind is the relationship existing between the farmer and his help, whether that help be the members of his own immediate family or is hired help.

The farmer in the majority of cases is primarily responsible for the existence of the right attitude of mind between himself and his workers. The worker must be interested in his work; the farmer should see that the work is made so.

The right kind of a worker is fully fit about details; he is observant and helpful and his intelligent suggestions should be of very great use to his employer.

The farmer who extends only just as much consideration to his employee as the law and his contract demand, can expect the same kind of consideration from his hired man, but if a little extra is given on his side, it will usually result in a little extra being given on the other.

The man who does not do any more work than he is paid for seldom gets paid for any more work than he does.

The attitude of the farmer towards his help and their attitude towards him are cause and effect.

The many problems of the business world of today would be a lot nearer solution if the practice of giving that little bit extra and of being a little more faithful in details, became more general.

Preacher Defined Seven Social Sins

Should Be Applied As Test to Individual and Community Activities

A great English divine recently preached a sermon on "seven social sins." He named his seven points and carefully expounded each one in a very fine series of arguments.

The New Orleans Times-Picayune finds them sufficiently important and interesting to stand alone and list them without the preacher's explanations, as follows: Politics without principle; wealth without work; pleasure without conscience; knowledge without morality; science without humanity; worship without sacrifice. They are recognizable evils. Expressed simply, they are easy for the thoughtful individual to understand, to meditate upon and to apply as a test to his own and his community's activities.—Morning News Dominion.

Had To Be Careful

Explanation of Guest Might Not Have Pleased Host

The following true story reached me from Scotland. After the guests had departed from a wild drive, the host discovered that someone had left a leather cigarette case behind. He then rang up the most likely owners, but drew blank. As a last resort, he phoned a friend who was, as the host knew, the possessor of one made of previous material, and was surprised to find that the owner of the leather case had been discovered. "But," said the host in surprise, "I thought you carried a very swaggy one?" "Yes," came the voice over the wire, "but I don't take that to every house I go to!"—London Mail.

Mr. Saunders' Pension

Charles Saunders, who made possible Marquis wheat, is pensioned at \$5,000 a year by the Canadian Government. This is unusual. Few discoverers and inventors get more than that out of years of work. Yet it is cheap for the Canadians. The government can easily afford the \$5,000 a year from the increased taxes paid by the men who cashed in on Saunders' labors.—Binger Commercial.

Events Of National Importance

The Kyoto cherry blossom festival, Japan's great national holiday, is celebrated in every town and village throughout the empire during the month of May, but its greatest point, so to speak, is the famous cherry tree at Kyoto, the first blossoming of which is regarded as an event of national importance, to be communicated by telegraph far and wide.

When a man is under the cloud of debt it's rather hard for his creditors to see the silver lining.

W. N. U. 1589

Plan Was Successful

Brooklyn Man Saved Property By Leaving Money For Burglar

At the close of each season for seven years past Alfred Bohm, a retired Brooklyn business man, has left a \$50 bill and a note in his bungalow at Grand View, N.Y., the note requesting any chance intruder to please accept the money and leave without breaking any furniture.

Each spring for seven years Bohm has re-opened his bungalow and found the note and the fifty-dollar bill just where he had left them. But when he returned to prepare the bungalow for the coming season the bill was gone. His plan, however, was successful. For the burglar disturbed nothing and quietly left after scawling in pencil across the note, the word, "Thanks!"—New York Sun.

Faith Endures Even In Russia

Communism Cannot Stamp Out Influence of Christianity

Eight years have passed since communism began its task of extirpating the Christian faith from Russia, yet when the beloved Tikhon, patriarch of the Russian Orthodox Church, was banished, Moscow, the headquarters of the Soviets, saw such crowds of mourners as never before had gathered within its boundaries. The priest whom the Lenines and Trotskys dared not bring to trial, the man they feared to murder, the enemy whose body they could not diminish, commended in death homage that revealed the soul of persecuted Russia faithful and unbroken.—New York Sun.

Their Favorite Literature

Taste of Noted Authors Varied in Choice of Books

We are not told which work of Voltaire it was that was found on Sargen's death-bed; but the volume makes one of an interesting company. Tenyson died with his Shakespeare open at "Cymbeline"; and Macaulay, when he was found dead in his library, had a number of the "Cornhill" before him, open at the first chapter of Dickens's "Love the Widower"; Mark Twain, with almost the last effort of his mind, turned to Carlyle's "French Revolution."—London Observer.

Letter Travelled Seventy Years

Posted in 1854 Has Just Been Returned To Orange, N.J.

Receipt at the post office of a letter which did not reach its destination, after being seventy years on the way, was announced by Postmaster Strickland. The letter was postmarked in Newark, December 31, 1854, and addressed to Mr. Condit, St. Augustine, Fla. It bore a notation for its return to East Orange. The St. Augustine post authorities, in returning it, said the house to which it was addressed had been torn down "decades ago."

Voluntary Egg Pool

The Saskatchewan Co-operative Creameries, Ltd., announce the establishment of a voluntary egg pool at Saskatoon, Regina, Melfort, Yorkton, Weyburn and North Battleford cold storage plants. Under this scheme the farmer may, through his own organization, carry his own eggs into storage and market them through his own company when he so desires.

Wealth Of Canada

National Wealth Increases Three-fold Within Forty Years

Agricultural revenues of Canada last year amounted in the aggregate to \$1,453,368,000—an increase of \$103,000,000 over 1923. Field crops alone contributed nearly one-billion dollars to this total, and dairy products \$234,000,000. As the land physically suitable for agriculture is estimated to be about 300,000,000 acres, and as that under cultivation to field crops last year was only 57,852,000 acres, it follows that the potential agricultural resources of the country are very great.

From the forest area of 1,200,000 square miles, which the Dominion is entitled to possess, products, in the form of logs, lumber, shingles, pulp, paper, etc., are annually being obtained to the value of \$527,000,000. Every province, except Prince Edward Island, is more or less rich in minerals, and although extensive known mineralized areas have yet to be prospected, let alone developed, the output of the past two years has had an annual average total value of \$212,000,000. Canada's fisheries, which both in extent and in quality of product are not surpassed by those of any other country, annually yield, according to the latest official figures, a value of over \$42,000,000.

The waterpowers of the country, which by the end of 1925 will be developing electric energy to the extent of four million horsepower, have within the last decade or two become important revenue producers. Three years ago the electricity developed was valued by the Dominion bureau of statistics at \$82,228,000. But since then there has been an increase of approximately 25 per cent. in the energy brought under development, so that the value of the electric power at present being generated in all probability exceeds \$100,000,000.

National wealth, according to latest figures of the Dominion bureau of statistics, is estimated at \$28,200,000,000. This is a remarkable increase over 1910, when it was placed at \$18,000,000,000. Forty years ago, according to statistics then compiled by the Canadian Government, the national wealth of Canada was estimated at \$3,250,000,000.

Europe's Oldest Man

Physicians Will Examine Him For Cause of Longevity

Zair Effendi, who is believed to be Europe's oldest man, counting 181 years, recently stopped at Belgrade, Yugoslavia, one night on his way to Rome. He is said to have been born in Kurdistan in 1774, but has lived in Constantinople most of his life. Italian doctors invited Zair to Rome, where he is to be the guest of the Anthropologists' Society and will be examined by physicians who are interested in the causes of his longevity. He has only one child living, a son who is 80.

His Accidental End

There are all sorts of ways of putting things, and some sound much better than others. For example, there is the case of the man of whom Lord Coleridge used to tell, whose father was hanged for highway robbery. Someone asked him how his father died.

"Sir," said he, "he fell from a scaffolding outside Newgate while he was talking to a clergyman."

Great Demand Now For Jungle Animals

England Now Rivaling Germany As Importer For Zoo

The demand for wild animals of various parts of the world has been greater this spring than in 15 or 20 years owing to the desire of numerous continental cities to replace the stocks in their zoological gardens which were depleted during the war.

Moscow, among other far away points, has come into the market for various specimens, the Soviet authorities having announced intentions to re-open the zoo in the Russian capital which had been closed since the revolution. The Russians desire particularly jungle beasts and birds of plumage not procurable in their own country. Riga, Latvia, which had an enormous zoo prior to the war, has also begun buying animals in foreign markets to replenish the supply which had begun to disappear eight or nine years ago when the food situation in the war-stricken areas was at its worst.

England has come to the front this year as a rival of Germany in the importation of zoo animals, this country now being better prepared to branch out in this particular business since the Germans lost their colonies. While there has been a little more than the usual demand for elephants and other standard zoo attractions there have been more orders for tigers, leopards, lions and zebras than the dealers have been able to supply.

In one stamping recently there arrived 15 elephants, 12 Tasmanian devils, 12 Tasmanian tigers, 12 Tasmanian wombats, numerous wallabies, hundreds of assorted parrots, as well as bears, antelopes, zebras, tigers, leopards and a collection of cranes, in crates, which is said to be the largest shipment of its kind on record.

Urges Return To Thrift

Tendency to Drift From Old Standards Should Be Discouraged

That the tendency to drift away from the old standards of religion and thrift in Canada should be discouraged by every agency for good in the country, and that the task of Canadianizing the people, which lies to a great extent at the door of the press of the country, should not be eliminated, were the strong points in the address of Col. Henry Cockshutt, Lieutenant-Governor of Ontario, at a recent luncheon of the Ottawa board of trade.

He said the foreign circulation of periodicals and newspapers tends to cause a drifting away from Canadian ideals, which is not good for the country.

A Glimpse of Yesterday

A "high" for some youngsters in Central Park the other day was an old-style, old-fashioned one-horse shay wandering down the west drive. It attracted the kiddies who surrounded it, obliging the driver to stop for a few moments while they looked over the outfit. In a few more years, perhaps, the horse, like the cow, will be a curiosity in city-bred little ones.—Variety, New York.

The Christian Spirit

Asked by her Sunday school teacher to give the Bible verse for that day's lesson, a little western girl recited:

"Go you into all the world and spread the gospel to all the people."

Rockefeller Pays For View

Has Spent Thousands to Keep View From Mansion Clear

It will cost John D. Rockefeller \$25,000 to prevent the erection of an unsightly standpipe which the village of North Tarrytown proposed to erect at Shaft 9 on his property.

North Tarrytown recently voted \$470,000 for a new water tower. When it sought a site from Mr. Rockefeller for the standpipe he said he would much prefer to give it land for a reservoir as the standpipe would mar the view from his mansion. The village willingly agreed to a proposition submitted by Mr. Rockefeller that he give it land and pay for the extra pipe.

John D. Rockefeller, Jr. conducted the negotiations for his father. He has agreed to give the village a fine site for the reservoir, and to lay about 1,000 feet of pipe and pay the extra cost. The village board has accepted the offer with thanks.

Not so long ago, Mr. Rockefeller made a proposition to the village of Tarrytown to camouflage the smokestack on its pumping station at Shaft 9, so it would harmonize with the view from Kykuit Hill. The village accepted, and Mr. Rockefeller sent painters to do the job. If there is anything that jars the eye magnate it is to have some unsightly object mar the beautiful view from Pocantico. It has cost him thousands of dollars to keep the view clear.

Passengers Give No Trouble

Railway Crew Carry "Dead-Head" Family Without Protest

Officials of the T. & E. Railway don't know anything about this, but for some time now, through the convenience of the conductor, engineers—in fact, the whole crew—a family of six have been carried as "dead-head" on one of the passenger trains running between Hamilton and Waterford. The family is made up of Mr. and Mrs. Robin Redbrast and their four children. Contrary to most travellers, they "prefer a lower berth, right over the wheel." Their nest is firmly attached to an angle of the steel beams on the upper part of one of the trucks of coach No. 17. During the western part of the season, the train to which this coach is attached, the longest stop is usually Brantford. Each time the train stops there, Mr. Redbrast evinces the true spirit of fatherhood by foraging for worms on nearby lawns. He seldom returns until the bell on the engine clangs, and then he goes back, his little looking like an angel's butt end. Members of the train crew are deeply interested in their feathered friends, and woe to the wheel-tapper who should mistake their nest for a bunch of bearing waste.

How Spectacles Were Named

Derived From Latin Word Meaning To See

The little stems which with which so many people have to cover their eyes, and generally known as spectacles, were first invented in the middle ages. At that time Latin was in universal use as the language of all science and scholarship, and it was therefore only natural that this new invention should be given a Latin name. Spectacles comes from the word which means to see or to look at, and this was the title, afterwards corrupted into our "spectacles," that was given to these aids to vision. Later on in history, the clumsy framework of the old spectacles was improved upon, and the new and lighter glasses were called oculos or pinceps (pince nose), to distinguish them from the old spectacles. In a sense, of course, all eyeglasses are spectacles, but we use the word only as denoting a special form of frame.

Was Once Humble Instrument

French Horn Demanded In Orchestras Developed From Hunting Horn

The French horn, whose sweet tones are such a delight to many people, and which is so much in demand in orchestras, has developed out of the old hunting horn. In order to be carried by the hunter on horseback, the horn had to be bent into a spiral shape so that it might slip over the head and rest on one shoulder. The Germans still know it as the waldhorn or forest horn. The addition of valves has made the chromatic scale possible to an instrument which, at first, was only capable of the natural notes of its tube. If the spirals of a French horn were straightened out, the instrument would be 17 feet long. That is why they and the spirals of other brass instruments remain spirals. The instruments could not be used otherwise.—Music World.

Mixed Colors

She—Can you tell me why a black cow gives white milk that makes yellow butter? He—For the same reason that blackberries are red when they are green.

American Capital For Development

Ten Thousand Acres of Land Purchased in Manitoba by U.S. Investors

Option on 10,000 acres of land in Manitoba has been secured by capitalists of the moving picture business who have been acquiring millions of dollars in Western Canada and are about to start re-investing some of the millions, according to J. Shirley Lowther, of Boston. The land is suitable for ranching and agricultural purposes, but Mr. Shirley declined to say exactly to what purposes it would be put.

Mr. Lowther and his associates have been in the province for the past year, buying up tracts of land, which Mr. Lowther stated is in a district contiguous to Winnipeg:

"I cannot tell you who are the men behind the enterprise," said Mr. Lowther, "except to say they are world-wide known for the prominence they have had in promoting the production of pictures in California and New York. They have many millions of profits to invest and some of these millions are now being directed toward Manitoba. They are shrewd business men and know their investment will be a good one."

"I have secured by option and otherwise 10,000 acres of land and the people of Manitoba are going to be made sit up and take notice of this investment within 90 days when I hope to have the entire transaction completed.—Free Press.

Fault-Finding Is Easy Job

Takes Strong Personality To Be Successful In It

To acquire wrinkles, cultivate the complaining habit, and find fault with everything, from the weather to the way the cat catches mice. Fault-finding is an easy job; thousands are working at it, and earning premature wrinkles, a peevish expression and a querulous voice. Any weeping can do it, but it takes a strong personality to go on working cheerfully, helping, not hindering, constructing instead of destroying. A donkey hitched to a lawn mower stopped to bray at a girl gathering fruit, until she laughed and said—"I'm doing my best. You are just braying as an excuse to loaf, and because it is easier to bray than to pull that machine or pick these berries." As Sam Weller remarked, the meaning of that observation lies in the application thereof.

Japan Wants Tall Men

Declares Buddhist Religion Responsible For Their Short Stature

Japan, is disenchanted with the short stature of its men and proposes to add inches to the height by converting them into a meat eating race.

Dr. Asa Tanimura was in Fresno, Cal., enroute to Washington to confer with Herbert Hoover, secretary of commerce. Dr. Tanimura's mission in this country is to study the beef and pork production.

"The Japanese for ages have been eaters of rice and raw fish," he said. "It is because of religious belief taught by the Buddhists, who believed that all four-legged animals are unclean. This is wrong. Religion has taken inches off Japan. We want our men to be tall like the rest of the world."

Why Dogs Are Called Curs

Abbreviation of "Curtailed" Dates Back to Middle Ages

Many dogs in the Middle Ages had their tails sliced off because some king put a tax on dogtails and their owners evaded the tax by cutting off the tail. It was mostly poor folks who did that, folks who couldn't afford to pay the tax. Their dogs were not thoroughbreds, usually, but mongrels. When these dogs' tails were cut off, they were called "curtailed dogs." By and by that was shortened to "cur dogs" and then to "curs." That's how mongrels got to be called "curs." But centuries after that tax was repealed, folks cut off their dogs' tails, believing it would make the poor beasts strong.

Rural Centenarians

The latest census bulletin shows that 21 of Saskatchewan's 757,000 people were 100 years old or more in 1921. Eleven of these old people were men and ten were women. Not one of them, according to the bulletin, lived in a city or town, or over 10,000 population. There is further testimony to the superiority of country life.—Saskatoon Star.

Presented With Medal

The Royal Society of Canada gold medal presented by Sir Joseph Flavelle and awarded each year for scientific achievement was this year to Dr. Charles E. Saunders, Fellow of the Society, for his discovery and development of Marquis wheat.

Young Britons for Canadian Farms

First party of British 'teen age boys to come out to Canada under the auspices of the British Immigration Aid Society in 1923. They were photographed outside the Windsor Station, Montreal, after landing from the "Minnesoda" and while awaiting trains to take them to their future homes in various parts of the country. Most of them had farm homes before leaving the Old Country and they all look forward with eagerness to taking up Canadian farming and hope to ultimately own farms of their own in the Dominion.

Serve Mustard with all meats

Mustard neutralizes the richness of fat foods and makes them easier to digest. Mustard enables you to enjoy and assimilate food which otherwise would burden the digestive organs.

but it must be Keen's

Copyrighted, 1922, by Rafael Sabatini

"CAPTAIN BLOOD," a Vitaphone picture with J. Warren Kerrigan in the title role, is an adaptation of this thrilling novel.

CHAPTER XXII.—(Continued)

Blood would not slip out of Port Royal again that same night. But that honest Bishop had passed the word, and the fort kept a sharp lookout. In the end, though it took a fortnight, Blood bubbled him. He sent me and most of the men off in a frigate that I bought for the voyage. His game—as I heard secretly told me—was to follow and give chase. Whether that's the game he played or not I can't tell you; but here he is before me as I'd expected he would be.

Having delivered himself of his decoction of fact and falsehood, and thereby added one more to the exploits of Peter Blood, he enquired where the Captain might be found. Being informed that he kept his ship, Wolvestone stepped into a boat and went aboard, to report himself, as he put it.

In the great cabin of the Arabella he found Peter Blood alone and very far gone in drink—a condition in which no man ever before remembered to have seen him. As Wolvestone came in, the Captain raised bloodshot eyes to consider him. A moment they sharpened in his gaze as he brought his visitor into focus. Then he laughed, a loose, idiotic laugh that yet somehow was half a sneer.

"My God, Peter, what's this?" "Rum," said Peter. "Rum, from Jamaica."

"I'm asking you what this is?" he bawled.

"That," said Captain Blood, again, and smiled. "Just rum. I answer all your questions. Why don't you answer mine? Watcher goneroo wi' me?"

"I've done it," said Wolvestone. "Thank God, ye had the sense to hold your tongue till I came. Are ye sober enough to understand me?"

"Thank or sober, alais derstand you."

"Then listen." And out came the tale that Wolvestone had told. The Captain steadied himself to grasp it.

"It'll do as well as truth," said he, when Wolvestone had finished.

"Ye're maulin'," Wolvestone growled. "We'll talk again tomorrow."

"They did; but to little purpose, either that day or on any other day thereafter while the rains—which set in that night—endured. Soon the shrewd Wolvestone discovered that rum was not what ailed Blood. There

was a canker eating at his heart, and the Old Wolf knew enough to make a shrewd guess of its nature. He cured all things that dangled petticoats, and, knowing his world, waited for the sickness to pass.

But it did not pass. When Blood was not dicing or drinking in the taverns of Tortuga, keeping company that in his saner days he had loathed, he was shut up in his cabin aboard the Arabella, alone and uncommunicative. His friends at Government House, bewildered at this change in him, sought to reclaim him. Made molasse d'Ogeron, particularly distressed, sent him almost daily invitations, to few of which he responded.

Sometimes Blood asked himself why he had come back to Tortuga at all. He was degenerating visibly, under the eyes of all. He allowed a black beard to grow on cheeks that had never so carefully shaved; and the long thick black hair, once so sedulously curled, hung now in a lank, untidy mane. Wolvestone, the only one who held the clue to this degeneration, ventured once to hear him frankly about it.

"A moment, M. de Cussy. I do not think M. de Baron has observed that I am not alone. Let me present to you, sir, my companions: Captain Hagthorpe, of the Elizabeth, Captain Wolvestone, of the Atropos and Captain Yberville, of the Lachesis."

The Baron stared hard and haughtily at Captain Blood. His manner implied plainly that he despised them, and that he desired them at once to understand it. It had a curious effect upon Captain Blood. It awoke the devil in him, and it awoke, at the same time, his self-respect, which of late had been slumbering. A sudden shame of his disordered, ill-kempt appearance made him perhaps the more defiant. He waved his captains to the chairs that stood about.

"Draw up to the table, lads. We are keeping the baron waiting."

They obeyed him, Wolvestone with a grin that was full of understanding. Hagthorpe grew the stare of M. de Rivaroli. He did the only thing remaining to mark a distinction between himself and them. He put on his hat.

"Ye're very wise now," said Blood amiably. "I feel the draught myself."

And he covered himself with his plumed easter. "Shall we come to business?"

(To be continued)

British Expert Proves Her Innocent After 350 Years

Nearly 350 years after her execution for conspiracy against the life of Queen Elizabeth, modern science in the role of a belated champion of Mary, Queen of Scots, has declared her guiltless of the charge.

Almsworth Mitchell, Home Bank expert, after spending several years collecting and examining original records and actual parchment, ink, parchment, seals and details of handwriting, has stated definitely that Mary, Queen of Scots, could not possibly have written the letters which caused her to be sent to the scaffold.

Mr. Mitchell, publishing the result of his investigations in the June number of Discovery, produces evidence to show that the letters ascribed to Mary were in the handwriting of her secretary and betrayer, William Maitland, of Lothburgh. Mr. Mitchell, who is the author of "Science and Criminals," and other works, has figured in important trials where the authenticity of documents played a vital part.

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

Air Pilots Amused

Experienced Men Had to Take Instruction According to Regulations

Officials, pilots and mechanics at the Crofton air station had a good laugh at the expense of government regulations recently. All the air express pilots are members of the air force reserve, and one or two were up for their annual training as reservists. To the amusement of their fellow pilots and officials, they were not allowed, owing to regulations, to take up an aeroplane by themselves.

"They had to go through the usual instruction sitting in pupil's seat while the instructor showed them how to fly the planes."

"Gone," is the only word on a slab over the grave of an auctioneer in a churchyard at Worcester, England.

CHAPTER XXIII. M. de Rivaroli

Captain Blood was in a disgruntled mood when he sailed from Tortuga, and still in that mood when he came to his moorings in the bay of Petit Goave. In that same mood he greeted M. de Baron de Rivaroli when this nobleman with his fleet of five men-of-war at last dropped anchor alongside the buccanier's ship.

Summoned to wait on him, Captain Blood repaired to the Castle of Petit Goave, where the interview was to take place. The Baron, a tall, hawk-faced man of forty, very cold and distant of manner, measured Captain Blood with an eye of obvious disapproval.

Of Hagthorpe, Yberville and Wolvestone, who stood ranged behind their captain, he took no heed whatever. M. de Cussy offered Captain Blood a chair.

"A moment, M. de Cussy. I do not think M. de Baron has observed that I am not alone. Let me present to you, sir, my companions: Captain Hagthorpe, of the Elizabeth, Captain Wolvestone, of the Atropos and Captain Yberville, of the Lachesis."

The Baron stared hard and haughtily at Captain Blood. His manner implied plainly that he despised them, and that he desired them at once to understand it. It had a curious effect upon Captain Blood. It awoke the devil in him, and it awoke, at the same time, his self-respect, which of late had been slumbering. A sudden shame of his disordered, ill-kempt appearance made him perhaps the more defiant. He waved his captains to the chairs that stood about.

"Draw up to the table, lads. We are keeping the baron waiting."

They obeyed him, Wolvestone with a grin that was full of understanding. Hagthorpe grew the stare of M. de Rivaroli. He did the only thing remaining to mark a distinction between himself and them. He put on his hat.

"Ye're very wise now," said Blood amiably. "I feel the draught myself."

And he covered himself with his plumed easter. "Shall we come to business?"

(To be continued)

Says Scottish Queen Was Not A Traitor

British Expert Proves Her Innocent After 350 Years

Nearly 350 years after her execution for conspiracy against the life of Queen Elizabeth, modern science in the role of a belated champion of Mary, Queen of Scots, has declared her guiltless of the charge.

Almsworth Mitchell, Home Bank expert, after spending several years collecting and examining original records and actual parchment, ink, parchment, seals and details of handwriting, has stated definitely that Mary, Queen of Scots, could not possibly have written the letters which caused her to be sent to the scaffold.

Mr. Mitchell, publishing the result of his investigations in the June number of Discovery, produces evidence to show that the letters ascribed to Mary were in the handwriting of her secretary and betrayer, William Maitland, of Lothburgh. Mr. Mitchell, who is the author of "Science and Criminals," and other works, has figured in important trials where the authenticity of documents played a vital part.

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

Air Pilots Amused

Experienced Men Had to Take Instruction According to Regulations

Officials, pilots and mechanics at the Crofton air station had a good laugh at the expense of government regulations recently. All the air express pilots are members of the air force reserve, and one or two were up for their annual training as reservists. To the amusement of their fellow pilots and officials, they were not allowed, owing to regulations, to take up an aeroplane by themselves.

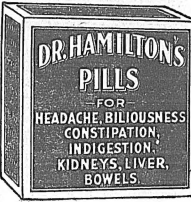

"They had to go through the usual instruction sitting in pupil's seat while the instructor showed them how to fly the planes."

"Gone," is the only word on a slab over the grave of an auctioneer in a churchyard at Worcester, England.

First Aid

In case of sprains, bruises and inflammation apply Minard's Liniment at once. It prevents complications, soothes and heals.

MINARD'S "KING OF PAIN" LINIMENT

Egypt's Governor Well Chosen

Sir George Lloyd Understands People and Has Perfect Knowledge of Arabic

No better man could have been selected to succeed Field Marshal Viscount Allenby as British high commissioner for Egypt and for the Sudan on the Right Hon. Sir George Lloyd, the former governor of Bombay, has left an enduring memorial in India in the form of the great barrage over the Indus at Sukkur, which is known as the Lloyd Dam.

Among Sir George Lloyd's qualifications for the post of British high commissioner for Egypt and the Sudan, with headquarters at Cairo and salary and allowances amounting to \$100,000, are his perfect mastery of Arabic and his knowledge of everything in connection with Islam, especially in relation to its political problems. It was because of his remarkable understanding of all these matters that Lord Kitchener appointed him early in the Great War to assist him in organizing the Intelligence Service in the Near East.

She Felt Better After the First Box

New Brunswick Lady Is Now Enthusiastic About Dodd's Kidney Pills

Madame A. Godin Suffered With Her Kidneys and Urinary Trouble. St. Jeanne D'Arc, N.B.—(Special). "Pardon me for not writing to you before about your Dodd's Kidney Pills, but when one enjoys good health one is always busy."

"Some time ago I was suffering with my kidneys and weakness of the bladder. I read in your Almanac that Dodd's Kidney Pills were good for this trouble and decided to try them."

"I had not a great deal of confidence in pills because I had tried so many other kinds without good results. To my surprise after I had taken the first box, I began to feel better. I continued taking them and am now completely relieved of my trouble. I advise all those who suffer with their kidneys to use them. It gives me pleasure to tell all my friends to use them."

This statement, which speaks for itself, is sent to us by Madame A. Godin, well-known in this place.

Canada's Literary Achievements

Has a Sturdy Native Literature to Her Credit

Interesting evidence that Canada is making progress not only along material lines, but in the world of letters, is found in the fact that a Canadian literary exhibit is one of the features of the Canadian Pavilion at the British Empire Exhibition now in its second year in London, England. The exhibit represents both French-Canadian and English-Canadian literature from the earliest dates down to the publications of 1924, and has been assembled by co-operation between the Canadian Government and the Canadian Authors' Association. Catalogues of Canadian books, both in English and French, have been prepared for distribution at the exhibition, and bear testimony to the fact that Canada has already a sturdy native literature to her credit.

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

New York's Mystery Chinese

Ancient Oriental Has Not Left Shop For Thirty Years

There is an old Chinese in Pell Street, New York, who sits in his little shop window from noon until Chinatown's closing time. He seems carved—an expressionless Buddha with unwinking eyes. He is said to be past 90.

In all the thirty years he has been down there he has never been known to leave his shop. He knows nothing of the New York about him. His world is encompassed in what he sees while perched upon his stool. He has a white wife who is seen now and then.

He takes no interest in disposing of the wares on his shelf, dried shark's fins, water lily flour, nuts, punk sticks and packages of tea. The story goes that he is a human devil chaser and that superstitious Chinese pay him fees to keep evil spirits away from them.

A writer says: I visited his shop while in the quarter to talk to him. But he would not talk, and was annoyed, and in his piping voice said: "You no buy, so away! No talker."

I went over to see Hong Lee, the printer, who often tells of Chinatown characters. But he refused to discuss this ancient.

At the mention of his name Chinatown closes up.

Wise mothers who know the virtues of Mother Graves' Worm Expeller should always have it at hand, because it proves its value.

Our Thoughtless Waste

Article in C.N.R. Magazine Could Be Applied to Any Business

The Canadian National Railways Magazine, in an effort to assist the management of the road in its efforts to effect economies, with a view to impressing the users of paper clips gives the appended bit of satire:

"One hundred thousand paper clips are used for: Linotype clamps, 7,160; bobbed hair holders, 10,801; pipe cleaners, 3,443; emergency garter clips, 807; ear removers, 5,534; lamp shade holders, 122; shirt sleeve adjusters, 4,183; Ford repair parts, 5,303; tooth picks, 9,021; bachelor buttons, 7,200; cuff links, 5,302; poker chips, 15,413; olive stabbers, 426; Eversharp pencil repair kit, 7,324; toys to be while telephoning, 14,163; holding papers together, 23. Total 100,000. This apt illustration of thoughtless waste is applicable to 1,000 other inexpensive articles besides paper clips, and to almost every business. Little economies effect big savings.—Brantford Expositor.

The Short Skirt

President Coolidge's recent declaration that the short skirt hurts the textile industry led a lady to ask him, at a Washington reception, if he thought the short skirt immoral.

"No I wouldn't say that," he answered.

"What would you say, then, Mr. President?" the lady persisted.

"I say," he replied, "that this skirt is all right, as far as it goes."

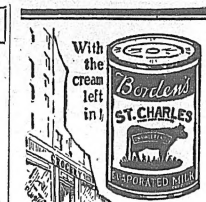

A free post was recently established at Kiel, Germany.

Winnipeg Conventions

1925 Will Be the Biggest Year Experienced for Tourist and Convention Parties

From present indications 1925 will be the biggest year that Manitoba has ever experienced in regard to tourists and convention parties. Already the Woodmen of the World, American Legion, Architects and Engineers of Minnesota Societies and the Canadian Bread and Cake Bakers' Association have signified their intention of visiting Manitoba, and more particularly Winnipeg, during the coming summer.

THE ONE SURE WAY TO GOOD HEALTH

Is Keeping the Blood Pure by Using Dr. Williams' Pink Pills

Impure, weak blood is the cause of most of the troubles that afflict people. This is the cause of the wretched feeling of languor and faintness, pains in the back and side, headaches and breathlessness, that afflict women and make her daily life a torture. To get new health and strength the blood must be enriched. What Dr. Williams' Pink Pills have done for me. After my first baby was born I seemed to have little energy. I felt weary and run-down and unable to do even the ordinary household duties. I felt I needed a tonic and as I had long seen Dr. Williams' Pink Pills advertised I decided to try them. I got a supply and myself away from a doctor, and before very long the result was wonderful. Day by day I regained my former strength and energy. The pills seemed to give me a keen appetite and I gained in weight and soon was able not only to do my work about the house and as I had long seen with many chores on the farm. For this reason I would advise women, particularly those who live on the farm, to keep a supply of these pills always on hand. One trial will convince you of their worth. I have recommended them to many of my friends. I have never heard they failed to produce good results."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Taking To Grapefruit

Consumption of grapefruit has increased 70 per cent. in Great Britain in the last year. Despite his hazards, Britishers probably have concluded that it's the sporting thing to do.—Buffalo Express.

When Holloway's Corn Remover is applied to a corn it kills the roots and the callosity comes out without injury to the flesh.

Winnipeg's Population

Winnipeg's population now totals 135,143, according to the annual report of the city assessor. This does not include Greater Winnipeg, which has with the city proper, a population of approximately 235,000.

KING OSCAR SARDINES

"When you see a desk-bound jockey casting the fly on the French River, or exhibiting the skin of a Napoleon trout, you may have him for a second business man."

Some men are stamp collectors, some play golf, yet others go off across the world in search of big game. Some hunt hidden treasures whether of an archaeological nature or the raw material as found in the Canadian mine. To some men these things are merely hobbies, to others a living.

Some businesses and some occupations call for a breathing down of the east-iron partitions which we are apt to erect between what the world is pleased to call "a living" and a "hobby."

When we have worked for some time at earning a "living" we are apt to be suddenly aware that something of strength, something of alertness, some "virtue" has gone out of us. And in order to get back, we go about recasting that lost strength. By nature man is not a "specialist."

Yet we all know, to our cost, the tendency of modern business-life is to make him so. The pressure of "business" of which we boast, the system, the competition, of which we think so highly, as to be always in pursuit of it, is in reality a juggernaut, a fierce feudal overlord of the worst type, since it is in bondage to it without knowing it. We actually take our chains lovingly to our hearts.

Sometimes the awakening comes in the form of a rude shock. A physician's dictum. But as often as not in quite another form. That subtle and yet tangible shock received when some younger, fresher mind, some "mere child of a fellow" beats us at our own game. That is the awakening that hurts. Because we know that at the club, other men are saying "Fell down on the job." Whereas the truth is, "Stuck to his job, not wisely but too well," would be so much nearer the truth.

When civilization first began its pressure. When business first began to be so intense we felt we "could not leave it," the number of "break-downs" was terrific. But just about that time we began to see that to go down and out was not playing the game, but surrendering, surrendering not altogether to pressure from without but to weakness within—a failure to stand up against "fearful odds"—unexpected injuries.

And so we began to cast about for a means of strength—that from strength of nerve—which would stand up squarely under ordinary fire and rise like a well-trimmed ship to meet the waves of unexpected storms. This thing has been thought out and acted upon as a positive condition of modern life and business may say within the past twenty years, and more firmly yet within the last ten years.

Men now go away and leave their business at least once each year. And the wiser take a vacation not only in summer but in winter as well. The more intense the business, the heavier the fire, the greater need for re-energizing that strength which is burned out. The greater need for the gathering up of new ideas.

So, when you see a business-man, a banker or railroad president, or a company official, or any other desk-bound jockey casting the fly on the French River, or exhibiting the skin of a Napoleon trout sketched on a board, pleased as any school boy who has carried his bat out at cricket, or kicked a goal for the school team, you know him not so much for a great sport as for a good business man. The very fact that he belongs to those who get back to Nature wins your confidence. Yet know him for a man who has the business situation of the day in hand. One who is abreast—about eyes—of the tide which surges in the affairs of men. "A live wire," competing youth, calls him—Victoria Haycraft.

Chinook Wins Against Cereal

On Tuesday evening the Chinook Ball team played a fast game with the Cereal aggregation at Cereal, winning by a score of 16-5. This score does not really indicate the quality of the play, as the Cereal boys put up a skillful game, and had it not been for Charley's heavy hitting, and new method of running bases, the Chinook fans would have had less reason for making so much noise.

This was one of those rare games where the umpire's decisions were always satisfactory. Jim Rennie calling the balls accurately even after it was dark.

The Cereal fans, especially the ladies, gave their team good support, and it is hoped they will be with the boys when the return game is played at Chinook.

A number of Chinook enthusiasts drove down to see the game, and though some were delayed by getting stuck in the mud, all report having enjoyed the evening.

It is rumored that Charley has a very tempting offer from the New York Giants!

With 3,000 Mennonite farmers to arrive this summer from Russia 11,000 of these people will have come to Canada during the past three years. They are all agriculturalists and have taken up land, principally in the Western provinces.

Although there are 60,000 motor cars in Saskatchewan, the number of horses in the province is larger than ever and is steadily increasing.

Teachers' Summer Session

The summer courses for teachers will be held at the University this year from July 6 to August 3, and the attendance is expected to be fully up to former years.

Ship Buffalo Soon

The shipment of several thousand head of buffalo from the Wainwright National Park to the northland where they will be set free will commence shortly.

Big Film Company Coming

Hoot Gibson and his company of film actors, are coming to Alberta from Hollywood for the purpose of making a big western motion picture based on the Calgary jubilee and stamped to be held in July. The most of the scenes will be made in Southern Alberta and around the stamped.

Another Good Bond Sale

The Provincial Treasury has just concluded negotiations for the sale of \$2,250,000 4 1/2 per cent. twenty-year bonds dated June 15 1925, for July delivery and payment. The price received was highly satisfactory to government officials, as the basis of sale is considerably better than any received by the Province since 1913. These bonds are being offered in New York to-day at a price of 96.17, which is a yield rate of 4.80. The purchasers are the National City Company and Harris, Forbes and Company, who also purchased by tender the April refunding issue of the Province. The price in this case, however, is much higher.

Tourist Route Now Open

The Banff-Windermere Highway across the Rockies was opened for traffic May 31, and already there has been considerable traffic over the road.
